

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A golf club head comprising:  
a gold club head body including a recession; and  
a weight member mounted in said recession of said gold club head body, said weight member being securely mounted in said recession of said gold club head body by ~~means of a~~ welding procedure using a part of a welding material melting from said recession of said golf club head body in the welding step, said weight member being made of a material having a melting point higher than that of said gold club head body, avoiding melting of said weight member during said welding procedure, only a portion of said golf club head body fusing with said welding material to provide an engaging flange while using said welding material for proceeding with said welding procedure for said weight member, said weight member includes a protrusion and an engaging portion thereof correspondingly engaged with said engaging flange of said golf club head after the welding step.

2. (Original) The golf club head as claimed in claim 1, wherein said weight member is made of a material including tungsten, tantalum, molybdenum, and niobium.

3. (Original) The golf club head as claimed in claim 1, wherein said weight member is made of a material including

tungsten, tantalum, molybdenum, niobium, and a small amount of other metals and formed by powder metallurgy.

4. (Original) The golf club head as claimed in claim 1, wherein said golf club head body is made of one of titanium and an alloy using titanium as its main composition.

5. (Original) The golf club head as claimed in claim 1, wherein said golf club head body is made of one of low carbon steel and low alloy steel.

6. (Original) The golf club head as claimed in claim 1, wherein said golf club head is made of stainless steel.

7. (Original) The golf club head as claimed in claim 1, wherein said golf club head includes a flange acting as said welding material.

8. (Original) The golf club head as claimed in claim, wherein said welding material is the same as a material for said golf club head body.

9. (Cancelled)

10. (Currently Amended) The golf club head as claimed in claim 91, wherein said protrusion forms a shoulder to constitute said engaging portion on said weight member.

11. (Currently Amended) The golf club head as claimed in claim 91, wherein said protrusion of said weight member includes a peripheral inclined face to constitute said engaging portion.
